

VAR-A-TECH by PROMAX with Vibration Reducing Flute Geometry has a longer tool life resulting in greater productivity. Users will benefit from the reduction in chatter as it allows for more aggressive machining with greater depths-of-cut and heavier feeds. This exciting tool allows roughing and finishing at the same time while achieving improved surface finishes. Enjoy fantastic results in Titanium, Inconel and other High Temperature Alloys as well as Steels, Stainless Steels, High Strength Alloys and Cast Iron.

Ready For Shrink-Fit Holders, however flats can be added on sizes 3/8" thru 1"

Standard With The Most Advanced Aluminum-Titanium-Nitride (AlTiN) Coating
